Using the microphone

1. Connect BY-DM100 to Android USB Type-C port on your Android device:

Tips and notes:

1. Some device default to use its build-in microphone, you may need to download a third-party recording App and set external microphone mode manually.

2. In case your Android device can not recognize BY-DM100, please try disconnect and reconnect to USB Type-C port of your device and try to record again.
3. It is recommended that you set your Android device to airplane mode to prevent any incoming calls from disrupting your recordings.
4. Before recording an important event, record and play back a short test clip with the microphone attached to ensure audio recording is functioning properly.
